The Board of Education

The Board of Education, the legal representative of the people, is elected by the voters to decide the general principles and policies of our school system, District Number 71. Servants of the community, these public-minded citizens serve without pay. The school board is composed of seven members, each elected for a three-year term. The president is elected to his position by the voters, while the secretary is chosen from the members. The present board consists of D. L. Huxtable, president; Mrs. Ralph Kelly, secretary; C. E. Bowen; Donald E. Vance; Dr. G. E. Hunt; Dr. W. E. Schowengerdt; and Mrs. J. E. McGinty. Miss Carrie Busey, appointed to her position, serves as clerk. The dean of the board, Dr. W. E. Schowengerdt, has served for over thirty years.

Regular sessions of the board are held the first Thursday of each month, with special and called meetings as the demand arises.

The responsibilities of the board are shared through appointed committees, but decisions on questions involving the schools' operations are based on majority action of the board.

knock 'em down . . . drag 'em out . . . that's how the **maroon** sold all those luscious subscriptions . . . up and over the goal! . . . selling was only a small part of the trials and tribulations of an annual . . . the **business managers, mary marsh** and **leonard davis**, became weak and run down . . . when it came time to sell ads, their hair turned temporarily white . . . they shoved pencils and blanks into the hands of bewildered salesmen and sent them on their way . . . their tales of woe only put more **spirit** into room 128 . . . they trudged from place to place . . . new shoes required more retreads . . . ads had to come in faster and faster . . . but that wasn't all . . . **maroon editor, jane nelson**, had her troubles, too . . . pasting sophomore, junior, and senior pictures proved an adventure in itself . . . once glued they had to be ripped off . . . this happened again and again . . . the process was slow . . . rubber glue floated around 128 . . . varnish came off table tops . . . the smell was terrific . . . **shirley bash** and **jean gwinn**, senior editors, were right

BEHIND THE SCENES

The glamour of huge industrial plants, intricate machinery, and mass production methods is the usual mental picture of American Industry. And a true picture of much manufacturing . . . but not so with photo engraving.

Machinery? Certainly! Precision equipment, but not mass production. Glamorous? Yes! Skilled hands and chemical processes and always intriguing.

Your year book is the result of many procedures . . . photography, copy writing, art, engraving, printing and binding, plus salesmanship, accounting, etc.

The graphic arts industry has many branches and many opportunities. You might consider the possibilities of your future in this highly interesting business.
